

Dear colleagues,

This is the first announcement for the 15th Coordinated Working Group Meeting (for CWGM 1-14 see: <http://ishcdb.nifs.ac.jp/>) to be held at IPP Greifswald (Germany) from Mar. 21.-23.03.2016. The venue and time was suggested in view of the conduction of the first experimental campaign of W7-X which is planned to end on Mar. 10.

Purpose of the meeting is the discussion about joint activities under auspices of the IEA implementing agreement on Stellarators and Heliotrons.

A tentative list of topics is:

- Fuelling and particle transport
- Impurity transport
- Experimental tests of theoretical predictions
- Status of ISHPDB (International Stellarator Heliotron Profile Database)

Session coordinators are highly welcome as well as proposals for further topics – please let me know your thoughts in the coming weeks, but no later than Feb. 15, 2016.

Logistic details will be communicated in a second announcement mid of February.

Best wishes, Andreas

PD Dr. Andreas Dinklage
