

Max Planck Career Evolution Web Series

FROM SCIENCE2INDUSTRY

Program September 2020

Pursuing a career in science but also interested in looking beyond academia?

Take part in our discussions, nourish your skills in our career trainings and workshops and learn how MPG alumni managed the transfer from academia to industry. Our Max Planck Career Evolution Web Series: From Science2Industry provides you with essential resources and relies on experts from the Trainer and Coaching Pool of the Planck Academy, the Industry Track Network and the alumni community of the Max Planck Society. Take part in our sessions every Thursday. Our meetings take place at <https://mpggv.webex.com/meet/career.steps.net>.

The Career Evolution Web Series: From Science2Industry is offered by the Industry Track of the Planck Academy in collaboration with the PhDnet and PostdocNet of the Max Planck Society. It particularly addresses PhDs, Postdocs and Research Group Leaders but is also open to any interested party of the Max Planck Community.
