

# Checklist before departure

## Outside

- Check tire pressure / visual inspection of tires for damage
- Retract awning
- Carefully remove and stow power cables in rear garage
- Step at the side door must be retracted electrically (engine will not start, if step has not been retracted)
- Turn off gas (at gas bottle outside on the left side), close the door
- Check lights (turn signals, reverse gear, brake lights, hazard warning lights)
- Remove wheel chocks and stow them in the red bag in the rear garage
- Lock outside doors resp. The flaps must engage (Toilet service door, gas, water, electricity, rear garage on both sides)
- Check parking space (something forgotten/left behind?)

## Inside

- Close and lock drawers, cabinet doors, roof hatches and windows
- Store heavy stuff in the lower cabinets, store loose objects
- Be sure that bottles (i.e. cleaning and rinsing agents) are tidily closed and safely stored in a cabinet
- Drive up the fold-down bed, secure with safety belt, turn the key to locked position and remove the key
- Secure ladders
- Turn slide on the toilet to „ZU“ (!)
- Lock the mirror cabinet in the bathroom
- Turn off gas in the kitchen!
- Turn off all lights in the camper
- Empty grey water bottle, key is in the glove compartment
- Fill in fresh water (if needed)
- Lock side door from inside

The refrigerator will switch to battery automatically when electric power has been turned off!

Have a save trip!
