

18th International Workshop on Hydrogen Isotopes in Fusion Reactor Materials

Abbey Frauenwörth, Chiemsee, Germany
May 25-28, 2026

Topics:

- Hydrogen isotope recycling, migration, retention, and release from fusion reactor materials and co-deposited layers
- Tritium removal techniques
- Influence of plasma impurities and seeded impurities on fuel retention
- Influence of neutron damage on hydrogen retention in materials

Abstract submission ends: March 1, 2026

Registration ends: April 26, 2026

Both via: hws-18@ipp.mpg.de

International Program Committee

A. Hassanein	Purdue University, West Lafayette, IN, USA
A. Widdowson	JET, UKAEA, Culham, UK
B. Wirth	University of Tennessee, Knoxville, TN, USA
D. Primetzhofer	Uppsala University, Uppsala, Sweden
F. Ghezzi	ISTP, CNR, Milano, Italy
J. Hu	IPP, CAS, Hefei, China
K. Heinola	IAEA, Vienna, Austria
R. Kolasinski	Sandia National Laboratories, Livermore, CA, USA
S. Krat	NRNU MEPhI, Moscow, Russia
S.-H. Hong	General Atomics, San Diego, CA, USA
Y. Ferro	Aix-Marseille University, Marseille, France
Y. Hatano	Tohoku University, Sendai, Japan
T. Schwarz-Selinger	Max-Planck-Institut für Plasmaphysik, Garching, Germany

Local Organizing Committee

T. Schwarz-Selinger
B. Perey
H. Maier
M. Zibrov
V. Burwitz
